

# Debut release from the **hottest** band since the Really **Hot** Chili Peppers **OUT NOW**

Every once in a while the NME will hail a band as the 'next big thing', and everyone who's anyone will be discussing their new album at the water cooler in no time. Those of us who aren't 'anyone' (or who have a life or even just a real job) invariably take a little longer to catch on. Rest assured that this is not why you haven't heard of **Zambian export band** - you might still be 'someone'.

So who are they? Little Bob Geldofs in the making? Heavens no! Are they the type of cover band that take themselves too seriously and put you off going to your local on a Friday night before 10pm? No. They hate cover bands as much as you do. Do they still think it's 1995? Well, they do all still live with their parents. Or maybe they are just genuinely nice guys trying to raise money for charity. Nobody's really sure.

Only one thing is certain; this record is for sale.

This record is *the future's been sold* by Zambian export band

1. Friday I'm In Love (The Cure)
2. Girl From 'Ards (Ash)
